28 September 2017

Design Mile 2017 at BIKINI BERLIN:
TheStudio by ElektroCouture is presenting captivatingly beautiful jewellery creations from a 3D printer – and you're invited to get involved!

If you would like to get an idea of what the jewellery of the future could look like, you'll find interesting insights at BIKINI BERLIN during the Design Mile from 5-7 October 2017: "TheStudio by ElektroCouture" will be presenting its futuristic jewellery design concept and ground-breaking future design technology.

Using the high-resolution 3D printers by Formlabs, Berlin's leading fashion technology company will be turning jewellery designs into a reality. Visitors can witness the creation of various pieces of jewellery and decorative items live and can follow their journey in real time – all the way from the design to the finished item.

As a highlight, on Saturday 7 October curious DIY fans who want to find out about the fashion technologies of the future are cordially invited to get involved. Together with the TheStudio teams from ElektroCouture, participants can integrate light elements into the pieces of jewellery and adorn their creations with real crystals provided by Swarovski Professional in an interactive FashionTech workshop from 3:00 pm until 7:00 pm.

If you wish to participate in the workshop, please register in advance by sending an e-mail to hello@elektrocouture.com.
